

Transportation Management

“ Reining in global logistics costs is critical to corporate profitability. ”

BETH ENSLOW, ABERDEEN GROUP
NEW STRATEGIES FOR GLOBAL TRADE MANAGEMENT
MARCH 2005

Be enterprising.

Every aspect of managing your shipment lifecycle—from planning to execution to settlement—is becoming increasingly more complex. Customers are demanding more delivery choices for less. And the trend toward smaller, more frequent shipments traveling over greater distances and geographies is growing. At the same time, transportation managers face continuous pressure to contain logistics costs. That’s why enterprising companies turn to the experts at Infor™.

Leverage experience.

Infor offers solutions that let you not only survive—but thrive—in today’s complex and highly competitive marketplace. We have over 25 years experience in transportation and logistics. Every day we support thousands of trade lanes crossing hundreds of countries around the globe. The Transportation Management component of Infor SCM Transportation and Logistics strengthens your ability to manage the entire shipment lifecycle from order inception to delivery and improve supply chain efficiency by connecting you with your trading partners and giving visibility to orders, inventory, and participants throughout your supply chain.

Get business specific.

With Infor’s software as a service (SaaS) Transportation Management solution, you take command of processes including planning and optimization, execution, resolution, as well as reporting and analysis. We give you increased visibility and control of inventory in transit across your

global supply chain. That tighter control over your inbound and outbound shipments in turn reduces logistics costs, while improving procurement, fulfillment, and customer service efforts.

Highlights include:

Comprehensive global, multi-modal capabilities

Transportation Management enables you to direct the entire shipment lifecycle from planning and execution to settlement. We support all transportation modes including ocean, air, parcel, truckload (TL), less-than-truckload (LTL), rail, and door-to-door. We provide the only global transportation and international trade logistics compliance offering that manages carriers, orders, shipments, rates, accessorials, and customs data and regulations including restricted party screening in a single solution. Our system covers all the bases including:

- Unified platform for both global transportation and trade processes
- Visibility of orders, suppliers, and processes
- Transportation sourcing and RFPs
- Electronic contracts and rate management
- Inbound and outbound transportation management
- Inbound vendor routing compliance
- Shipment planning (aggregation, optimization, and consolidation), freight management, and carrier selection
- Total landed cost tracking
- Workflow enabled settlement and freight payment
- Comprehensive reporting and analysis

Control of transportation costs

Transportation Management delivers unmatched visibility from the first to the last mile. Our detailed analytics provide valuable insight regarding your logistics performance. You even have the power to track total landed cost, secure better rates with carriers, and optimize performance given numerous shipping options.

See results now.

With Transportation Management you'll gain greater global visibility and control of inventory in motion across your enterprise as well as your overall supply chain. And that translates directly to significant bottom-line benefits. Let this powerful solution help your company generate a fast return through:

- Increased order and shipment visibility
- Improved routing guide and carrier compliance
- Reduced transportation and inventory costs
- Improved regulatory compliance
- Enhanced delivery and customer service
